

# A REVIEW IN MEMES

Memes have been a great way to provide a laugh or two depending on the subject it is connected with. Our culture has used memes as a way of conveying feelings about a serious topic in a much less serious way. At the same time, memes serve an educational purpose - to demonstrate your understanding of the main idea(s) of the topic in just a few words along with an image.

## TASK

As a review of the theories covered in this unit you will be developing memes using the website [memegenerator.net](http://memegenerator.net).

You will need to have one meme per stage for each of the theories listed below (14 total memes):

- ★ Piaget's Theory of Cognitive Development (4)\*\*
- ★ Erikson's Theory of Social Development (8)
- ★ Kohlberg's Theory of Moral Development (6)

\*\*Piaget's stages can be done for extra credit - 5 points each, time permitting.

**Each meme will be worth 5 points each, making the review assignment worth 60 points.**

When you generate your meme you will need to copy it onto a Google Doc. Provide a label for each meme with the appropriate stage for each theory. You will need to email your final product to Mr. Fulton - [mfulton@muncieschools.org](mailto:mfulton@muncieschools.org) by the beginning of the class period the next day.
